Preface

This is the second Agricultural Report compiled on the national level. The Report provides series on agricultural statistics along with other related social and economic indicators, in twelve chapters. Additional information that is of importance to agricultural development will be included in subsequent reports. The Agricultural Statistics Report will be published annually.

Any suggestions that can assist in enhancing future reports will be welcomed.

The Central Statistical Office expresses appreciation for the assistance and cooperation from data providers.

The Commonwealth of Dominica

Description and General Background

The Commonwealth of Dominica is the most northern and largest of the Eastern Caribbean's Windward Islands, situated between Latitude 15° 20' minutes North and Longitude 61° 22' minutes West. It lies between the French islands of Guadeloupe to the north and Martinique to the south. The island is 751 square kilometers (289.5sq miles). Dominica's climate is classified a humid tropical marine, characterized by little seasonal variation between the wet and dry season. Its pronounced high rainfall during the wet season contributes to its lush vegetation.

The island's topography is rugged with steep, luxuriant rain forest mountains, deep river-incised valleys and tree-covered hills that produce and sustain pristine rivers, perennial streams and tumbling mountain waterfalls. The island has great diversity of flora and fauna. The Morne Trois Pitons National Park (incorporating the central mountain range) is inscribed on the United Nations World Heritage List since 1998, based on the criteria of Outstanding Universal Value to Mankind, its natural aesthetic, rich bio-diversity and irreplaceable contribution to the understanding of science and natural landscape phenomena.

Dominica's relatively undisturbed and rugged landscape, extensive forest, pristine fresh and sea water and overall ecological system have contributed to Dominica's being acclaimed as "the Nature Island of the Caribbean". This label has impacted favorably in positioning Dominica's global choices as a tourist destination for nature lovers and environmental adventure seekers. The island is currently promoted and is in its developing stage as an eco-tourist destination.

The island is subdivided into ten parishes or population zones with capital city Roseau, located within the parish of St. George in the south-west. The city of Roseau recorded a non-institutional population of 14,725 in the 2011 Population and Housing Census.

The 2011 end of year population of 71,324 comprises mainly people of African descent (86.7 percent) and a population of indigenous Kalinago people, the survivors of the original or first

people of the Caribbean. The Kalinago occupy a demarcated area called the Kalinago Territory, on the northeast of Dominica.

Cruise ships call regularly registering a record 516, 820 passengers in 2010. Visitors increased by 7.0 percent from 2000 to 2010, reaching a total arrival of 77,301 in 2010. The three major markets are the Caribbean accounting for 56.0 percent of visitors. United States of America, 26.0 percent and Europe 13.0 percent.

Political and Economic Situation

Dominica attained political independence from England in 1978 and retains a political organization based on the British Parliament multi-party democracy. Dominica inherited its official language, English. However, partly due to historical influences, the majority of the population speak a patois "kweyol" composing of French linguistic structures.

Traditionally, Dominica's economy has been based on agriculture. Recent global and regional events have contributed to the declining dominance of agriculture in particular the cultivation of bananas. Agriculture (mainly bananas) contributed 15.4 percent of Gross Domestic Product in 2000 and an estimated 10.62 percent in 2010. Economically, Dominica pursues and sustains a free-market and liberal economy. The three main contributing sectors to the economy were Transport, Storage and Communication, 15.31 percent ; Education(private-offshore institutions), 14.30 and Wholesale and Retail Trade, 14.03 percent. Real Estate, Renting and Business Activities followed with 10.79 and Agriculture, 10.62 percent.

The rate of inflation as measured by the Annual Consumer Price Index recorded 1.82 percent increase in 2011.

Comments:

The period 1st June - 30th September (Annually), is the official closed season for hunting turtles. Outside that period, the animals can be captured but only at sea. Land catch is prohibited since the turtles come ashore to mate or hatch. With reference to conchs, the catch size is restricted to 18cm in length.
