## *INTRODUCTION*

The 1967 Annual Overseas Trade Report retains the format of previous years. However, one table has been omitted and a new table included showing the trading activities between Dominica and the other British Caribbean Territories.

This year, all the printing was done by off-set and the Detailed Analyses were photographed by the Government Printery from tabulations produced by the Machine Section of the Treasury.

The figures published in this Report have been fully revised and should be regarded as final.

## II. EXPLANATORY NOTES

**The Boundary of The Statistical Territory;**

The Standard International Trade Classification (S.I.T.C.) issued in 1950 by the United Nations Economic and Social Council has been in use since 1951 for the classification of all merchandise. The main sections of S. I. T. C. are:—

- |  |
|--|
| Section 0 — Food   |
| 1 — Beverages and Tobacco  |
| 2 — Crude materials inedible except fuels                                |
| 3 — Mineral Fuels, Lubricants, and Related Materials                     |
| 4 — Animal and Vegetable Oils and Fats                                   |
| 5 — Chemicals  |
| 6 — Manufactured goods classified chiefly by Material                    |
| 7 — Machinery and Transport Equipment                                    |
| 8 — Miscellaneous manufactured articles                                  |
| 9 — Miscellaneous transactions and Commodities, not elsewhere specified. |

**System of Trade;**

The "Special" system has been used in the tabulation. That is, import figures include all goods cleared ex-warehouses for domestic consumption and they exclude all goods which remain in the custody of customs in bonded warehouses. Goods cleared ex-warehouses for export have also been included. Thus there is an appropriation to General trade.

Exports are divided into exports of domestic produce and re-exports shown separately. The latter, are goods exported essentially in the same condition in which they were imported. Exports of domestic produce include previously imported goods which have been transformed by processing in this Territory.

Except in the case of goods cleared ex-warehouses goods in transit through the State are not included in the trade figures.

**Quantities and Values;**

Generally, quantities and values have been based upon the declaration of importers and exporters. These people are liable to prosecution if their declarations are incorrect.

**Values shown are East Caribbean Currency Dollars;**

C. I. F. Value is used in respect of all imports. This is by definition "the price which an importer would give for the goods on a purchase in the open market, if the goods were delivered to him at the port of importation, freight, insurance, commission and all other costs, charges and expenses incidental to the purchase and delivery at that port (Except any duties of customs) having been paid." (Sec. 15 (2)(a) of Chapter 282 of The Laws of Dominica 1961)

F. O. B. Value is used in respect of exports. This is defined as the value at which Goods were sold by the exporter, and includes all local charges to the exporting vessel. It does not include cost of ocean freight and marine insurance. It includes local customs charges and other taxes in the State.

This F. O. B. value is at best an estimate for the following reasons:—

- (a) Particulars of values of goods shipped on consignment are not available at the time of shipment. Reasonable estimates therefore, have had to be made until more reliable figures could be used.
- (b) There have been valuable exports of goods shipped from certain subsidiary Companies to Principals abroad. Since there is the possibility of undervaluation by these firms, the values used have been estimates of F. O. B. values based on (a) world market prices where available, and (b) values of allied commodities exported.

**Classification of Countries and Currency Area Definitions;**

Imports are ascribed to the countries of origin of the goods. The "Country of Origin" is the country in which the goods were wholly produced, or manufactured, or the country in which any final operation altered, to an appreciated extent the character, composition and value of partly manufactured goods imported into that country. When the country of origin cannot be ascertained the "country of consignment" is used; that is, the country from which the goods were despatched.

Exports are ascribed to the countries of destination. These are not necessarily the countries of final consumption.

The definition of countries and currency areas are as given in the supplement to the Monthly Digest of Statistics of the U. K. Central Statistical Office.

**Exclusions;**

The following have been excluded from the trade statistics:

- (a) Ships' stores and bunkers supplied to locally registered craft.
- (b) Gold coin and bullion, issued coinage and issued bank notes.
- (c) Goods on lease such as cinematograph films.
- (d) Goods on loan as samples for exhibition or study.
- (e) Gifts from UNICEF and similar Organisations
- (f) Parcels post items of imports of less than \$5 strongly suspected as gifts.

**Symbols Used**

The following symbols and abbreviations have been used in the tabulations:—

B.	Ft	Nil (or negligible)
Bch		Board Foot
Cu. Ft.		Bunch
Doz.		Cubic Foot
Pk.		Dozen
L Gal		Pack
P. Gal.		Liquid (Imperial) Gallon
Gr.		Proof Gallon
Hun.		Gross
Lb.		Hundred
No.		Pound ( <del>and</del> devois)
Pr.		Number
Sq. Ft.		Pair
Sq. Yd.		Square Foot
O/W		Square Yard.
		Of Which

**Period Covered:**

The figures of imports and exports represent totals shown on all customs documents brought to account during the calendar year 1st January to 31st December, 1967. These do not necessarily include only goods or all goods which arrived into or were shipped from this territory during the period. Consequently discrepancies may occur between customs figures of imports and exports and figures obtained from other sources. However, for practical reasons, this definition must be maintained.

**III. REVIEW OF THE YEAR'S TRADE****Balance of Visiting Trade;**

Exports (including re-exports) amounted in 1967 to \$10,771 thousand — 1 per cent above the previous year's figure. Imports on the other hand showed little change, increasing by only \$295 thousand to \$17,240 thousand. Consequently there was an excess of imports over exports of \$6,470 thousand.

A summary of imports, exports and balance of visible trade during the years 1939 and 1949 to 1967 is shown on Table I in the statistical appendix. The following table is based on Table I and shows imports and exports per head of population for 1939 and 1959 to 1967.

YEAR	IMPORTS EXPORTS	
	DOLLARS PER CAPITA	
1939	10	6
1959	165	110
1960	167	104
1961	176	121

1964	230	132
1965	258	142
1966	247	147
1967	245	153

**Details of Imports and Exports;**

Detailed lists of domestic exports, re-exports and imports are shown at Tables I K, X, and XI. It is interesting, however, to observe fluctuations of principal imports and exports over the past five years.

**Direction of Trade:**

Details of origin of imports and destination of exports for 1967 are given at Table IV and VII. An analysis of values of imports and exports by principal countries and currency areas during 1963 to 1967 is shown at Table III. The values are expressed as percentages of total value of trade with the Commonwealth Caribbean Territories for the period 1963 to 1967 appear below.

The following summary of Table IV shows the position over the period concerning suppliers to and purchasers from this Territory during the period under review.
