INTRODUCTION

The Annual Overseas Trade Report for the calender year 1981, is the fourth such document published since 1969 and contains some changes in the Summary Tables compared with the 1980 Report.

The figures published in this report have been fully revised and should be regarded as final.

The Government of the Commonwealth of Dominica is deeply grateful to the Printing Unit of the UNDP/OECS Project for the Development of Statistical Services in the Eastern Caribbean for the services rendered in printing this report.

Mention should also be made of the Comptroller of Customs and his staff, as well as the Dominica Computer Centre without whose excellent co-operation this report would not have come into being.

The various Commercial Houses, other organisations and individual businessmen are to be highly commended for their co-operation in answering queries brought to their attention.

Users are reminded that the data contained in this report have been derived from customs documents brought to account during the period under review. As a result, there may be discrepancies between the figures on Imports and Exports extracted from the Customs Forms and data obtained from other sources.

Notification of errors and/or suggestions for the improvement of future reports will be appreciated.

1. SYSTEM OF TRADE CLASSIFICATION

The Standard International Trade Classification (Revision 2) issued by the Statistical Office of the United Nations as statistical papers Series M. No. 34/Rev. 2 of 1974, has been adopted in Dominica since 1981 January 01 with suitable modifications for the classification of all merchandise. The main sections of the SITC (R2) are:-

Section 0 - Food and Live Animals Chiefly for food
- 1 - Beverages and Tobacco
- 2 - Crude Materials, inedible, except fuel
- 3 - Mineral Fuels, Lubricants and related materials
- 4 - Animals and Vegetable Oils, Fats and Waxes
- 5 - Chemicals and Related Products, N.E.S.
- 6 - Manufactured Goods classified chiefly by material
- 7 - Machinery and Transport Equipment
- 8 - Miscellaneous Manufactured Articles
- 9 - Commodities and Transactions not classified elsewhere in the S.I.T.C.

2. SYSTEM OF TRADE

The "SPECIAL TRADE" system has been used in the tabulations. That is, import figures include all goods cleared ex-warehouses for domestic consumption and they exclude all goods which remain in the custody of customs in bonded warehouses. Goods cleared ex-warehouses for exports have also been included. Thus, there is an appropriation to General Trade.

Exports are divided into exports of domestic produce and re-exports, shown separately. The latter are goods exported essentially in the same condition in which they are imported. Exports of domestic produce include previously imported goods which have been transformed by processing in this country.

Except in the case of goods cleared ex-warehouses, goods in transit through the State are not included in the trade figures.

3. QUANTITIES AND VALUES

Generally, all quantities and values have been based upon the declaration of importers and exporters on the customs documents which are subject to verification by Customs Officials.

All values are shown in East Caribbean Currency Dollars.

C.I.F. Value is used in respect of all imports. This valuation is by definition "the price which an importer would give for the goods on a purchase in the open market, if the goods are delivered to him at the port of importation, freight, insurance, commission and all other costs, charges and expenses incidental to the purchase and delivery at that port (except any duties of customs) having been paid". (Sec. 15 (2) (a) of Chapter 282 of the Laws of Dominica 1961).

F.O.B. Value is used in respect to exports. This is defined as the value at which goods were sold by the exporter, and includes all local charges to the exporting vessel or aircraft. Sea and air freight and marine and air insurance are not included and cash and trade discounts to the purchaser abroad are deducted. It includes local customs charges and other taxes in the State.

This F.O.B. Value is at best an estimate for the following reasons:-

- (a) Particulars of values of goods shipped on consignment are not available at the time of shipment. Reasonable estimates, therefore, have had to be made until more reliable figures could be used.
- (b) There have been valuable exports of goods shipped from certain Subsidiary Companies to Principals abroad. Since there is the possibility of undervaluation by those firms, the values used have been based on (i) World Market prices where available and, (ii) values of allied commodities exported.

Articles exported from the country for repair are not valued on exportation and only the cost of repairs (plus any other appropriate charges) are added on reimportation.

4. DEFINITION OF COUNTRIES AND AREAS

The Statistics reported refer to the sovereign democratic republic of the Commonwealth of Dominica.

Imports are ascribed to the countries of origin of the goods. The country of origin is defined as the country in which the goods were wholly produced, or manufactured, or the country in which any final operation altered, to any appreciable extent, the character, composition and value of partly manufactured goods imported into that country.

When the country of origin cannot be ascertained, the "country of consignment" is used, that is, the country from which the goods were despatched.

Exports are ascribed to the countries of final destination, when known, or alternatively they are ascribed to the countries of last known destination. These are not necessarily the countries of final consumption.

The definition of countries and areas are as given in a draft countries list prepared by the United Nations Statistical Office (but see also special notes on geographical breakdown).

5. EXCLUSIONS

The following items have been excluded from the Trade Statistics:-

- (a) Ship's stores and bunkers supplied to locally registered craft.
- (b) Gold coin and bullion, issued coinage and issued bank notes.
- (c) Goods on lease such as cinematographic films.
- (d) Goods on loan such as samples for exhibition or study.
- (e) Gifts from UNICEF and similar Organisations.
- (f) Parcel Post items of imports of less than \$5.00 strongly suspected as gifts.

6. PERIOD COVERED

The figures of imports and exports represent totals shown on all customs documents brought to account during the calendar year 1st January to 31st December, 1981. These do not necessarily include only goods or all goods which arrived into or were shipped from this territory during the period. This definition although it may on occasions result in apparent discrepancies between the customs figures of imports and exports and figures obtained from other sources, must for various reasons be maintained.

7. SYMBOLS USED

The following symbols and abbreviations have been used in the tabulations:-

IV. REVIEW OF THE YEAR'S TRADE

1. BALANCE OF VISIBLE TRADE:

Exports (including Re-exports) amounted in 1981 to E.C. \$51,755,455 - representing 96.8 percent increase over the previous year's figure. Imports on the other hand increased by only 4.2 percent to \$134,104,071. Notwithstanding the large percentage increase in exports, imports exceeded exports by \$82,348,616.

A summary of imports, exports and balance of visible trade during the years 1977 to 1981 is shown on Table 1 in the Statistical tables.

2. DETAILS OF IMPORTS AND EXPORTS:

Detailed lists of imports, domestic exports and re-exports are shown at Tables 15, 16 and 17 respectively. It is interesting, however, to observe fluctuations of principal imports and exports over the past three years.

(See Tables 11 and 12) In 1981 exports of bananas regained the number position and represented 48.7 percent of total domestic exports, followed closely by toilet and laundry soaps with 40.6 percent.

(ix)

3. DIRECTION OF TRADE:

A Regional breakdown of the 1981 Annual Trade is recorded in Table 5. An analysis of values of domestic exports and imports by principal trading partners during 1979 to 1981 is shown at Tables 13 and 14. The values are also expressed as percentages of totals in the same tables.

4. VOLUME AND VALUE INDICES OF IMPORTS AND EXPORTS AND TERMS OF TRADE

Details of quantum and unit value indices of imports and exports and terms of trade for period 1977 to 1981 are shown in Table 2. Quantum and unit value indices of imports and exports sections of the SITC for the same period appear at Table 3.
