INTRODUCTION
CONSUMER PRICE INDEX
1992

This is the third annual publication on Consumer Price Index in Dominica. The contents show the monthly and yearly trends in consumer spending in the seven group indices- Food, Alcoholic Beverages and Tobacco, Housing and Utilities, Furniture and Household Equipment, Transportation, Clothing and Footwear, and Miscellaneous Expenses.

Among other information Tables 3 and 4 covers 17 years(1975 to 1992) of data on average year indices, and trends in Food and Non-food indices. Tables 5 and 6 represent information from the base year(1984) to 1992. Because of the Department's goal in presenting accurate and reliable data, slight revisions of annual indices were performed.

The Central Statistical Office is grateful for the co-operation it has received from the various establishments, firms and individuals covered in the "basket".

COMMONWEALTH OF DOMINICA

REVIEW OF CONSUMER PRICE INDEX - 1992

A 5.3 per cent increase was registered in the average index over the previous year, 1991-1992 (see Tables 3 and 4). Apart from a drop in August and November, the All Items Index for 1992 rose steadily with the sharpest increase occurring in the month of March (Table 2, Chart 1 refers).

Transportation, and Furniture and Household Equipment were the most stable group indices while all other groups reflected fluctuating movements (see Tables 1 and 2). It was observed that the fluctuations in the cost of electricity accounted for such movements in group index Housing and Utilities, as the other sub-groups remained stable.

The highest percentage increase recorded in 1992 was in group index Clothing and Footwear- 9.1% while the lowest percentage change was registered in Housing and Utilities- (0.1)%. In addition, in 1992 group indices Food, and Alcoholic Beverages and Tobacco recorded the highest percentage increases- 8.5% and 5.6% respectively, that is over the last four years (1989-1992). However, group indices Furniture and Household Equipment, and Housing and Utilities recorded the lowest changes in 1992 (see Table 5), as compared to the last four years (1989-1992).

The Food Index rose steadily for the first seven months of the year (1992), reaching a peak at 144.4 in July (Table 4 refers). After an acute decline in August, the index appeared to be stable up to the end of the year, when it reached 143.2, registering a 6.3% increase from January to December. The Non-food average index also rose steadily until it reached its highest point of 140.6 in the month of May. From then it tapered off until it slowly began increasing from September and then dropping again in December to 139.5, recording only a 0.7% increase from January to December. Over the year (1991-1992) the average Food index increased by 8.5% and the average Non-food index increased by 2.8%.

From the base year, July 1984, to July 1992, price increases were noted for most items (Table 7 refers). Salted fish, carrots, bananas, whisky, water, women's casual and formal dresses, girl's dress and doctor fees registered more than 100% increase in prices. Pre-school fees recorded a 275% increase over the nine years July 1984 (base year) to July

1992. Decreases of less than 15% were recorded in imported beef, chicken whole legs, butter, kerosene, electricity, women's formal shoes and toilet soap. The price of instant coffee decreased by 33.02 percent.

Price fluctuations were noticed in chicken wings, chicken whole legs, eggs, flour, tomatoes, cabbage, onions, oranges, grapefruits, melons, salt coffee beans, electricity, men's trousers and women's shoes. The most stable item was telephone services. The cost of one standard and the cost per excess call did not change over the period. The prices of rice, stoves, black and white television set and petrol were also considered stable over that period (July 1984-July 1992).
