INTRODUCTION

The Annual Overseas Trade Report for the calendar year 2010 retains the format of previous years with just a few modifications, that's is for the first time a table by Broad Economic Categories is presented in this report. The summary data published in this report have been fully revised and should be regarded as final.

The Central Statistical Office adopts this medium to record its appreciation to the Comptroller of Customs and Staff for the co-operation in the compilation of the data using the ASYCUDA World Software, which was implemented in Dominica in June 2010.

The office also acknowledges the efforts made by the staff of its own Trade Unit and Computer Section, in coding and checking the source documents, and computer processing of the data using the New Windows Version of EUROTRACE. EUROTRACE is a computer package implemented by the Central Statistical Office and the Organization of Eastern Caribbean States (OECS) Secretariat in January 1992, and to process and tabulate trade data originating from ASYCUDA. The Windows version was adopted in May 2010 with support from the CARICOM Secretariat Project to Enhance Merchandise Trade Statistics in CARICOM Member States and Associated States, with funding from the Ninth European Development Fund.

From January 2007 the Customs department introduced the 2002 Harmonized System Codes and Tariff. The Central Statistical Office reviewed and performed all modifications to this tariff in order to present a one to one correlation with the Standard International Trade Classification.

The various commercial houses, other organisations and managers are recognised for their cooperation in responding to requests for accurate data.

Users are reminded that the data contained in this report have been derived from customs documents brought to account during the period under review. Suggestions for improvement of future reports will be appreciated.

CHIEF STATISTICIAN

EXPLANATORY NOTES

1. SYSTEM OF TRADE CLASSIFICATION

The Standard International Trade Classification (S.I.T.C.) Rev.3 issued by the United Nations Statistical Office, Statistical Papers Series M. No. 34/Rev.3 1986 has been adopted in Dominica since January 01, 1992, with suitable modifications for the classification of all merchandise. Prior to this series No.34/Rev.2 of 1974 was issued. The main sections of the S.I.T.C. (Rev.3) are:-

Section	0	-	Food and Live Animals chiefly for food
	1	-	Beverages and Tobacco
	2	-	Crude Materials, Inedible, except fuel
	3	-	Mineral Fuels, Lubricants and related materials
	4	-	Animal and Vegetable Oils, Fats and Waxes
	5	-	Chemicals and Related Products, N.E.S.
	6	-	Manufactured goods classified chiefly by material
	7	-	Machinery and Transport Equipment
	8	-	Miscellaneous Manufactured Articles
	9	-	Commodities and Transactions not classified elsewhere in the S.I.T.C.

2. SYSTEM OF TRADE

The "SPECIAL TRADE" system has been used in the tabulations, that is, import figures include all goods cleared ex-warehouses for domestic consumption and they exclude all goods, which remain in the custody of customs in bonded warehouses. Goods cleared ex-warehouses for exports have also been included. Thus, there is an appropriation to General Trade.

Exports are divided into exports of domestic produce and re-exports, shown separately. The latter are goods exported essentially in the same condition in which they are imported. Exports of domestic produce include previously imported goods, which have been transformed by processing in this country.

Except in the case of goods cleared ex-warehouses, goods in transit through the State are not included in the trade figures.

3. QUANTITIES AND VALUES

Generally, all quantities and values have been based upon the declaration of importers and exporters on the customs documents, which are subject to verification by customs and statistics officials.

All values are shown in East Caribbean Currency Dollars.

Cost, insurance and freight (C.I.F.) value is used in respect of all imports. This valuation is by definition the price which an importer would give for the goods on a purchase in the open market, if the goods are delivered to him at the port of importation, freight, insurance, commission and all other costs, charges and expenses incidental to the purchase and delivery at that port (except any duties of customs) have been paid.

Free on board (F. O.B.) value is used in respect of exports. This is defined as the value at which goods were sold by the exporter, and includes all local charges to the exporting vessel or aircraft. Sea and airfreight, and

marine and air insurance are not included and cash and trade discounts to the purchaser abroad are deducted. It includes local customs charges and other taxes in the State.

This free on board (F.O.B.) value is at best an estimate for the following reasons:-

- (a) Particulars of values of goods shipped on consignment are not available at the time of shipment. Reasonable estimates therefore, have had to be made until more reliable figures could be used.
- (b) There have been valuable exports of goods shipped from certain Subsidiary Companies to principals abroad. Since there is the possibility of undervaluation by those firms, the values used have been based on (i) World Market prices where available and (ii) Value of allied commodities exported.

Articles exported from the country for repair are not valued on exportation and only the cost of repairs (plus any other appropriate charges) are shown on re-importation.

All quantities quoted in this report are in tonnes.

4. DEFINITION OF COUNTRIES AND AREAS

The Statistics reported refer to the sovereign democratic republic of the Commonwealth of Dominica.

Imports are ascribed to the countries of origin of the goods. The Country of origin is defined as the country in which the goods were wholly produced or manufactured, or the country in which any final operation altered, to any appreciable extent, the character, composition and value of partly manufactured goods imported into the country.

When the country of origin cannot be ascertained, the "country of consignment" is used, that is, the country from which the goods were dispatched.

Exports are ascribed to the countries of final destination, when known, or alternatively they are ascribed to the countries of last known destination. These are not necessarily the countries of final consumption.

The definition of countries and areas are given in a draft country list prepared by the United Nations Statistical Office (see special notes on geographical breakdown).

5. EXCLUSIONS

The following items have been excluded from the Trade Statistics:-

- (a) Ship's stores and bunkers supplied to locally registered craft.
- (b) Gold coin and bullion issued coinage and issued bank notes.
- (c) Goods on lease such as cinematographic films.
- (d) Goods on loan such as samples for exhibition or study.
- (e) Gifts from United Nations International Children Emergency Fund (UNICEF) and similar organisations.

- (f) Parcel Post items of imports less than \$5.00 strongly assessed as gifts.

6. PERIOD COVERED

The data on imports and exports represent totals shown on all customs documents brought to account during the calendar year 1st January to 31st December, 2010. These do not necessarily include only goods or all goods, which arrived into or were shipped from this territory during the period. This definition although it may on occasions result in apparent discrepancies between the customs figures of imports and exports and figures obtained from other sources, must for various reasons be maintained.

7. SYMBOLS USED

REVIEW OF EXTERNAL TRADE: 2010

Dominica's external trade recorded a total import bill valued at \$589.0. Domestic exports registered \$77.7 and re-exports \$5.7 million thus registering a deficit of \$505.7 million in the balance of visible trade (Table 1). This deficit registered a 2.0 percent fall over the last year.

In 2010, total exports were valued at \$83.3 million, registering a decrease of 9.3 percent in value terms, over the last year. Total imports also followed a similar trend recording a decrease of 3.1 percent. The slight dip in exports is mainly attributed to severe drought which affected the agriculture sector particularly in the first half of the year.

EXPORTS

Domestic exports registered a 9.96 percent fall. Decreases in main exports items, such as Bananas, Pumice sand/aggregate, Paints/varnishes and Plantains contributed to the drop in exports. Banana exports registered a decrease of 34.4 percent, followed by pumice sand/aggregate recording 3.9 percent, paints/varnishes 29.8 percent and plantains 13.0 percent. On the other hand soap exports increased by 10.5 percent (Table 11).

According to the Standard International Trade Classification (S.I.T.C) Rev. 3, Section 0, which mainly comprises Food, accounted for 41.1 percent of domestic exports compared to 49.5 percent in 2009. Section 5: Chemicals and Related Products (i.e. mainly soaps and paints) followed, accounting for 46.8 percent of domestic exports, compared to 39.7 percent in 2009 (Table 4).

Domestic exports of manufactured (soaps, paints, etc.) and quarried products (sand and aggregate, etc.) were valued at \$46.4 million, reflecting an increase of 2.4 percent, over the year. Primary products (mainly agricultural commodities) were valued at \$31.3 million and recorded a decrease of 23.7 percent over the last year.

From 1995 manufactured and quarried products have been the main foreign exchange earner in domestic exports (Table 9).

For the year in review re-exports accounted for 6.8 percent of total exports while domestic exports accounted for 93.2 percent (Table 10).

IMPORTS

The import bill fell by 3.1 percent over the last year. Within the Standard International Trade Classification (S.I.T.C) Rev. 3, Machinery and Transport Equipment (Section 7) accounted for 21.1 percent of total imports (Table 4.1). Road motor vehicles were valued at \$37.3 million, representing 30.0 percent of imports in Section 7. General industrial machinery and equipment (n.e.s.) \$27.9 million or 22.5 percent and electrical machinery apparatus and appliances (n.e.s.) and electrical parts \$20.6 million or 16.6 percent. Food and Live Animals Chiefly for Food (Section 0) accounted for 16.8 percent at a value of \$99.1 million, with meat and meat preparations valued at \$23.2 million, cereals and cereal preparations, \$18.5 million and dairy products, \$14.8 million. Minerals Fuels, lubricants and related materials (Section 3) accounted for 16.7 percent at, \$98.6 million, with petroleum and petroleum products and related materials valued at \$91.8 million, accounting for 93.1 percent of Section 3.

In comparison to 2009, the main contributing sections in the Standard International Trade Classifications (Section 0, 3, 6 and 7), recorded decreases, contributing to the 3.1 percent decrease in total imports.

In the principal items category, the main imports in 2010 were Diesel oil valued at \$57.0 million accounting for 9.7 percent, Machinery, other than electric \$56.6, registering 9.6 percent, Metal and their products \$38.1 million or 6.5 percent and Transport Equipment \$36.5 million recording 6.2 percent (Table 3).

Exports

Domestic exports (to CARICOM) recorded \$51.4 million, registering 66.2 percent of total domestic exports. However domestic exports to CARICOM recorded a 7.3 percent drop over 2009. Domestic exports to the O.E.C.S were valued at \$23.5 million, while imports registered \$25.9 million.
